Score Breakdown

The score starts at **100** and deducts points for each violated criterion. Each type carries a **base deduction** (Level A errors: 8–12 pts, AA errors: 4–5 pts, warnings: 2–4 pts) plus a **volume penalty** using diminishing returns ($\sqrt{\text{count}} \times \text{weight} \times 0.22$). Pages with Level A errors have a score ceiling: 1 → max 91, 2–3 → max 84, 4–9 → max 79, 10+ → max 69.

Issue Type	Count	Base	Total Deduction
Low Color Contrast (AA error)	x1	-4.4	-6.2
Total deduction			-6.2 pts → 94/100

Issues (1)

Low Color Contrast

WCAG 1.4.3 Contrast (Minimum) · Level AA

error · 1 instance

- "Engagement" — 2.81:1 (need 4.5:1 for normal text). Text #9a9a9a on #ffffff.

Increase text color contrast

Normal text needs a contrast ratio of at least 4.5:1. Large text (18pt+ or 14pt+ bold) needs 3:1. Use a contrast checker to find compliant color pairs.

```
/* WCAG requires 4.5:1 for normal text, 3:1 for large text */

/* Failing example */
.text { color: #999999; background: #ffffff; } /* ~2.8:1 */

/* Passing example */
.text { color: #595959; background: #ffffff; } /* 7:1 */

/* Use a contrast checker:
  https://webaim.org/resources/contrastchecker/ */
```
